Outlook

Posti's outlook for 2020 (updated):

The coronavirus situation makes the macro economic outlook extremely difficult to predict for the full year. Because of this, also Posti's full year outlook includes a significant level of uncertainty.

Posti's net sales in 2020, excluding possible new acquisitions and divestments, is expected to decrease from the previous year. The Group's adjusted operating result in 2020 is expected to increase from the previous year, when the postal strike had a significant negative impact on Posti's results.

The Group's business is characterized by seasonality. Net sales and operating result in the segments are not accrued evenly over the year. In Postal Services and consumer parcels, the first and fourth quarters are typically strong, while the second and third quarters are weaker.
